4390(U). Chupka, E. I. (et al.)

Method of Treating a Cellulosic Material.USSR pat. 1,390,284. Issued April 23, 1988. Filed: USSR appln.
4,135,780/29-12 (Oct. 17, 1986).

The method comprises coating the surface of the material with a polyhydric alcohol, followed by drying. The durability of the material is increased by improving its heat resistance and lightfastness if the polyhydric alcohol consists of an aliphatic 6-12 carbon alkoxydiol with an alkoxy group containing 1-4 carbons and a methyl group located on the carbon adjacent to a 1,3-diol nucleus. From: Otkryt. Izobret. no. 15: 126 (1988).
